## **DETAILED ACTION**

## Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (OCPA 1982); *In re Voge*, 422 F.2d 438, 164 USPQ 619 (OCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (OCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-45 are provisionally rejected under the judicially created doctrine of double patenting over claims 86-129 of copending Application No. 10/717,288. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: Both sets of claims are directed to the same conjugate of an affinity molecule and a water-dispersible nanoparticle, wherein the water dispersible nanoparticle comprises the same inner core, the same organic coating, the same

Art Unit: 1773

outer layer of a multiply amphipathic polymer, and a functional group linked to the polymer, and further wherein the affinity molecule is bound to the functional group.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

3. Claims 46-95 are provisionally rejected under the judicially created doctrine of double patenting over claims 130-178 of copending Application No. 10/717,288. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: Both sets of claims are directed to the same composition comprising the same conjugates of an affinity molecule and a water-dispersible nanoparticle, wherein the water dispersible nanoparticle comprises the same inner core, the same organic coating, the same outer layer of a multiply amphipathic polymer, and a functional group linked to the polymer, and further wherein the affinity molecule is bound to the functional group.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending

Art Unit: 1773

application. See *In re Schmeller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

4. Claims 96-140 are provisionally rejected under the judicially created doctrine of double patenting over claims 179-222 of copending Application No. 10/717,288. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: Both sets of claims are directed to the same nanoparticle conjugate of an affinity molecule and a water-dispersible nanoparticle, wherein the water dispersible nanoparticle comprises the same inner core, the same organic coating, the same outer layer of a multiply amphipathic polymer, and a functional group linked to the polymer, and further wherein the affinity molecule is bound to the functional group.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Sdmeller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP \$804.

5. Claims 141-189 are provisionally rejected under the judicially created doctrine of double patenting over claims 233-271 of copending Application No. 10/717,288. This is a

Art Unit: 1773

provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: Both sets of claims are directed to the same composition comprising the same nanoparticle conjugates each comprising an affinity molecule and a water-dispersible nanoparticle, wherein the water dispersible nanoparticle comprises the same inner core, the same organic coating, the same outer layer of a multiply amphipathic polymer, and a functional group linked to the polymer, and further wherein the affinity molecule is bound to the functional group.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schmeller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

- 6. References are cited as art of interest.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to H. T. Le whose telephone number is 571-272-1511. The examiner can normally be reached on 10:00 a.m. to 6:30 p.m., Mondays to Friday.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
